

The Seven Cosmic or Psychic Circles

In the URANTIA Book a Solitary Messenger of Orvonton describes the Seven Psychic Circles as progressive levels of human spiritual development and self-mastery that individuals traverse on their journey towards achieving higher spiritual consciousness and closer communion with God. These circles represent stages of intellectual, moral, and spiritual growth, with the seventh circle being the starting point and the first circle representing the highest attainable level before reaching fusion with the Thought Adjuster, the fragment of God within each person. As individuals advance through these circles, they experience increasing levels of spiritual insight, personality integration, and divine guidance, ultimately leading to a more profound understanding of universal truth, beauty, and goodness. Progress through the circles is marked by greater self-control, higher moral standards, deeper spiritual insight, and a more significant capacity for loving service to others.
